Canterbury Trap has developed another world first, a fully automated Trench system that one person can set up and operate.

The Canterbury Auto Trench system will emulate the traditional 15 trap layouts of the past, with one safe auto loading machine. Using the trusted Crusader trap for target delivery, along with specialized software to drive the 3 axis motion system to achieve all the required height, angle and target release positions required by the ISSF rule book, the one person operation makes practice on your own a reality.

Standard features

- Trench mode, emulates the traditional 15 trap layout
- Balltrap mode
- Practice mode
- One person operation
- Crusader trap for target delivery
- 300 capacity target hopper
- Double knife target splitter
- Gentle target delivery system
- Consistent target placement and presentation
- Remote safety
- Simple distance, height and Windage adjustment
- Emulate the traditional 15 trap layout
- Trap cycle time 2 seconds. Re position 8 seconds
- Achieves all the required height, angle and target release positions for Olympic trap
- Simple push button controls allow you to select any of the 9 ISSF programs
- Will handle up to 6 shooters at a time, fully emulating competition conditions
- Practice mode for a difficult height and angle combination
- Uses Canterbury wireless voice release technology including a wireless referee's hand piece
- Compatible with Canterbury's coin token system
- All steel construction, zinc plated for corrosion protection and powdercoated
- Available in 240V 50Hz. 110V 60Hz option
